

LOKA FLEET

MANAGEMENT SYSTEM — DICT REGION 2

DRIVERS' BRIEFING

How your four daily processes work in the app — and how to get every alert on your phone.

Vehicle Requests

• OB Pass Slips

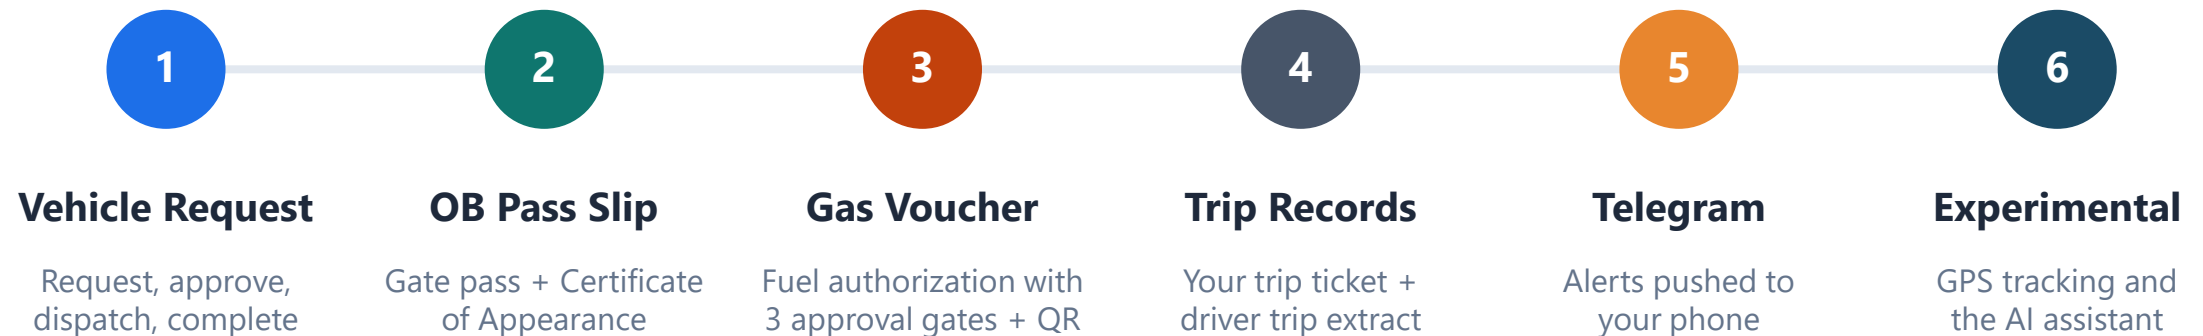

• Gas Vouchers

• Trip Records & Extract

• **Telegram Alerts**

Six stops, one system

All the paper you used to sign by hand is now a digital record — and after every stop, a 15-minute hands-on workshop.

One login: lokafleet.dictr2.cloud — same account, same password, works on phone and computer.

One login — every alert finds you

The system notifies you at every step. Four channels, so an alert always reaches you.

Bell

In-app — Instant — with a badge count on your menu.

@

Email — Full details, threaded by control number.

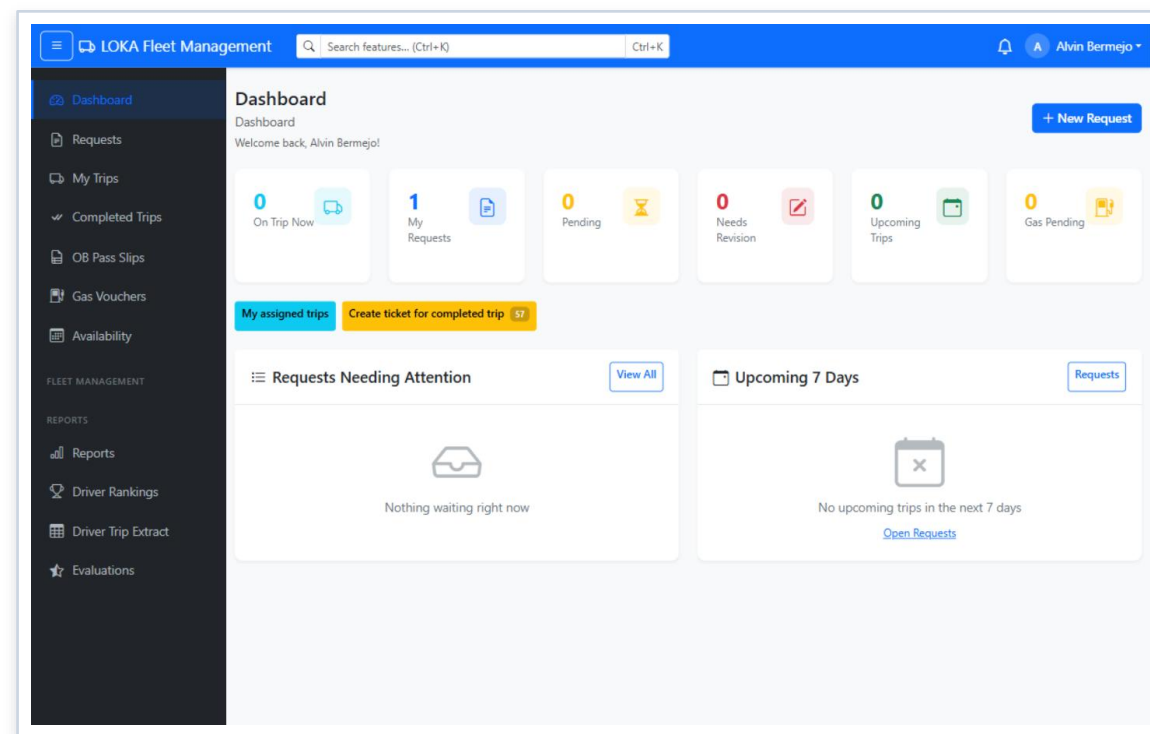

SMS

Text — Short message to your registered mobile.

TG

Telegram — Push to your phone — connect once (stop 5).

Alerts a driver gets: Requested as driver · Assigned as driver · Trip started · Trip completed · Changed or cancelled

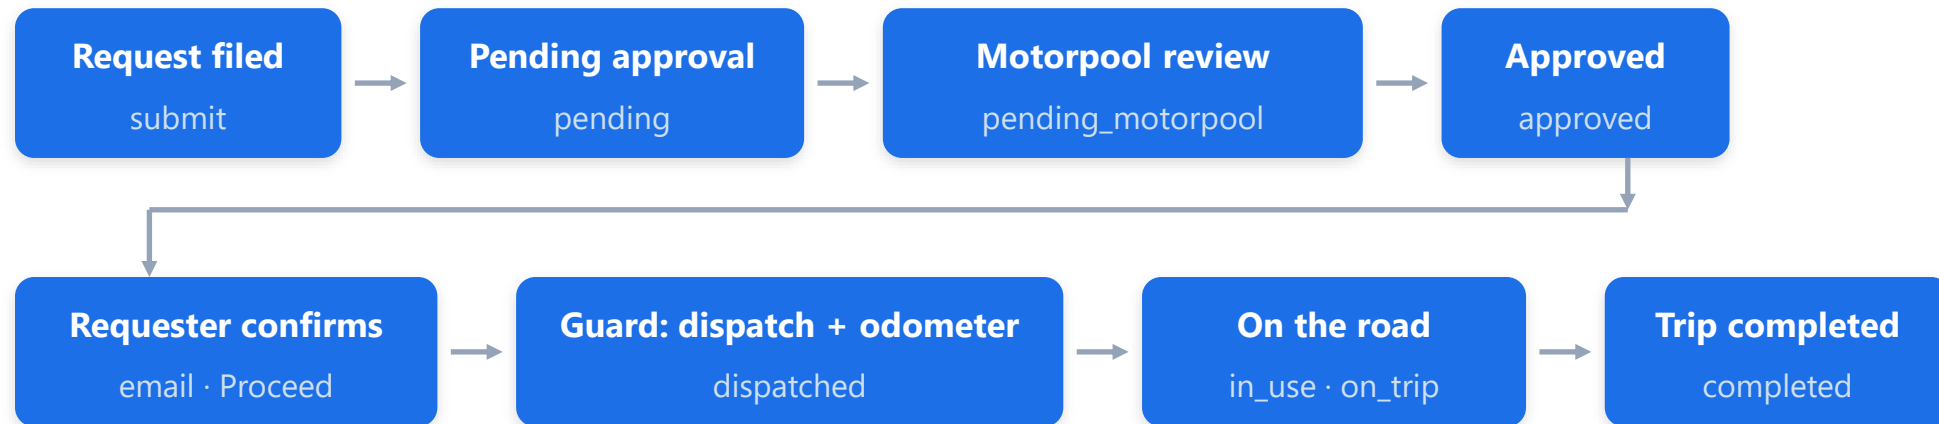

Your driver dashboard — trips, pending tickets and requests at a glance.

Alerts are queued, never blocking the system — **expect them within about 2 minutes** of the event.

STOP 1 · VEHICLE REQUEST

From request to completed trip

The requester files online; approvers and motorpool act in the app; the guard's stamps close the loop.

The small line inside each step is the exact status the app shows. Before the trip, the requester gets a confirmation email — one click and the trip is a go.

File early

The system enforces a booking window and minimum lead time before departure.

Trips cap at 72 hours

Longer trips are split — the app rejects over-length bookings automatically.

Conflict-checked

Motorpool sees schedule clashes before assigning a vehicle and driver.

What you do, step by step

Six touchpoints — the system does the paperwork, you do the driving.

- 1

Assignment alert arrives

"You Have Been Assigned as Driver" — bell, email, SMS, Telegram.
- 2

Open My Trips

Your schedule: trips, destinations, passengers, assigned vehicle.
- 3

Gate: dispatch stamp

Guard records dispatch + odometer. Vehicle In Use, you On Trip.
- 4

Drive the trip

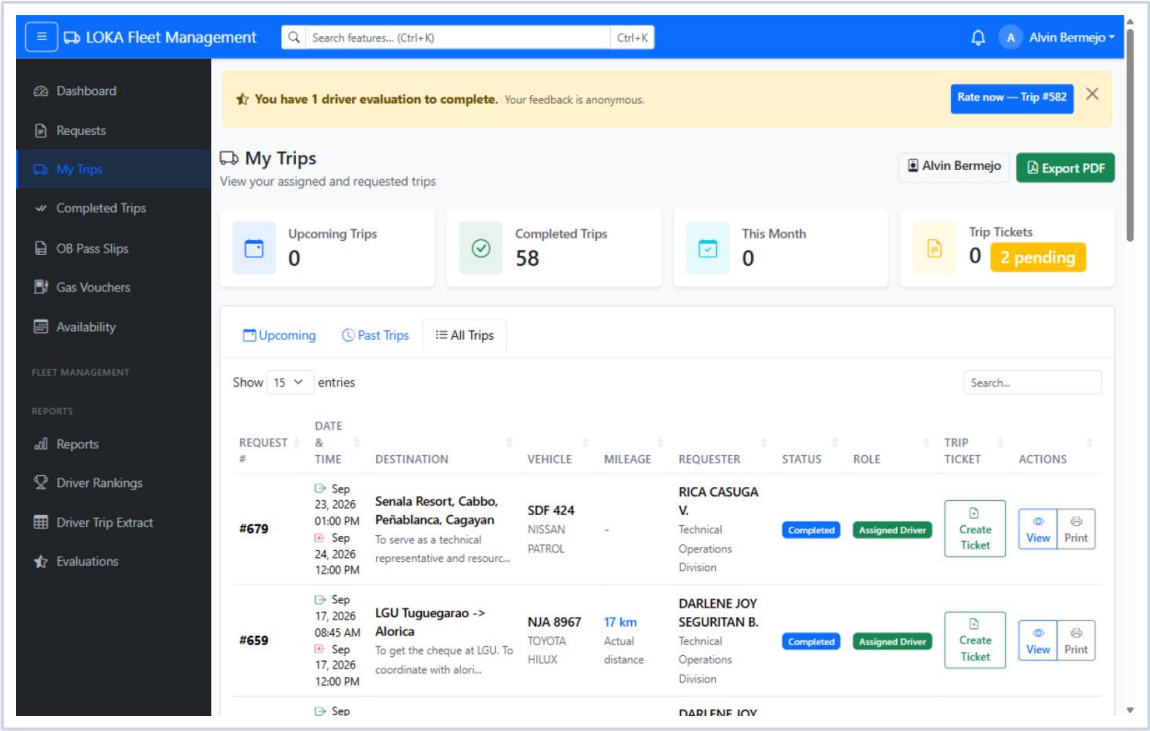

Stick to the approved destination and schedule.
- 5

Gate: arrival stamp

Guard records return + odometer — trip flips to Completed.
- 6

Get rated

Riders rate you anonymously: cleanliness, behavior, appearance, safety.

My Trips — assigned trips with Create Ticket and Print actions.

REMEMBER "Requested as driver" is not a confirmed trip — wait for the ASSIGNMENT alert before preparing the vehicle.

Hands-on: read your own schedule

Do it now on the practice account — or on your own phone if you already have a login.

SCENARIO

*Motorpool just assigned you to drive to Bayombong tomorrow, 8:00 AM.
Nobody has called you yet — everything you need is in the app.*

15

MINUTES

solo or in pairs · one phone or laptop per pair

YOUR TASKS

1

Open My Trips

Sidebar → My Trips → All Trips. Find the Bayombong trip.

2

Read the trip row

Say the date, time, destination, vehicle and plate out loud.

3

Export your schedule

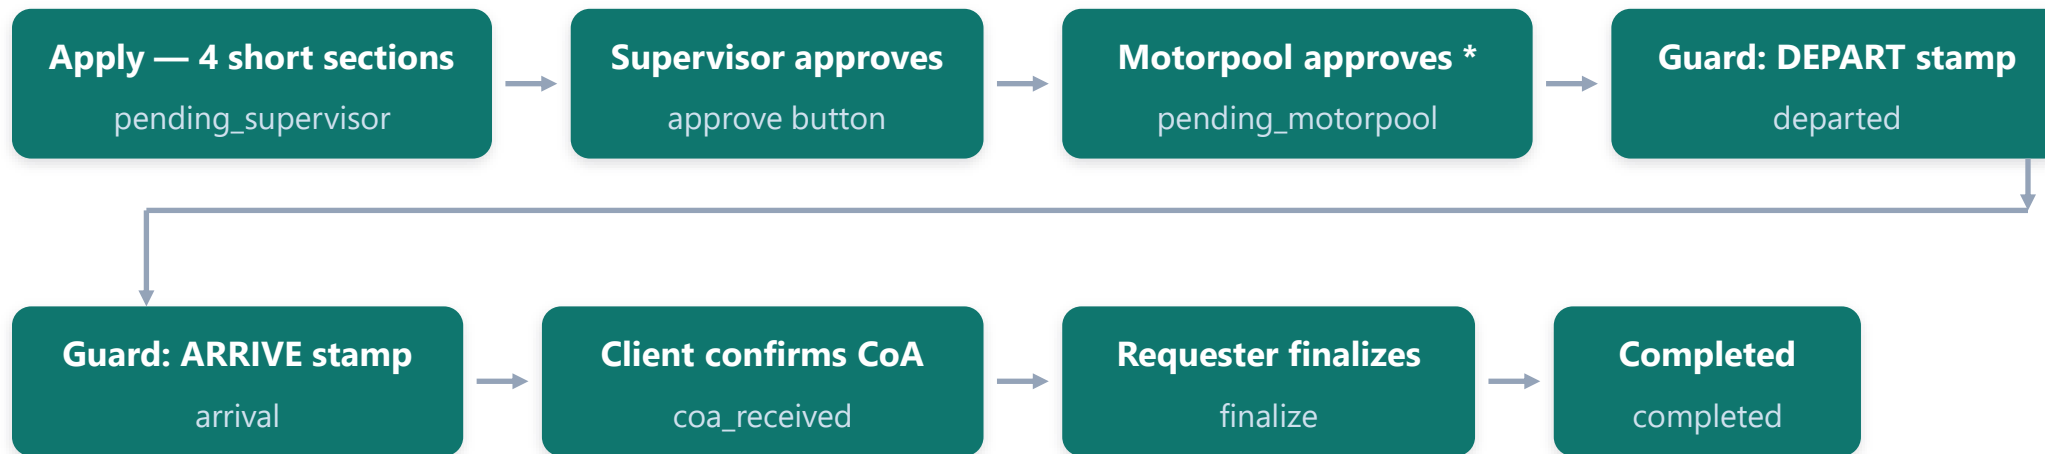

Tap Export PDF — your trips list opens ready to print.

YOU'RE DONE WHEN

You can state tomorrow's schedule — time, destination, vehicle — **without asking anyone.**

The gate pass that follows you out the door

Official Business outside the office: numbered slip, supervisor approval, gate stamps, and a client-confirmed Certificate of Appearance.

* Official DICT vehicle only — a private-vehicle slip skips Motorpool and is approved right after the supervisor. Small lines = the exact status the app shows.

Needs changes? Supervisor or motorpool returns it for revision — you fix and resubmit. Cancel is final.

Bound to a trip? If the slip is tied to a vehicle request, the guard's dispatch/arrival stamps the slip automatically.

STOP 2 · YOUR PART

Filing an OB pass slip

One form, four short sections — then the slip travels while you do.

- 1

Apply — Steps 1 & 2

Trip details (purpose + date); vehicle: official DICT plate or private.
- 2

Apply — Steps 3 & 4

Pick supervisor (+ motorpool head for official); optional companions.
- 3

Print the approved slip

Every slip carries its own pass slip number.
- 4

Gate stamps

Guard taps DEPART / ARRIVE — your time-stamped gate record.
- 5

Client confirmation

The office visited ticks proof-of-service, leaves name + contact.
- 6

Finalize

You close the slip — its QR verifies it as genuine on any phone.

The apply form — four guided sections, one submission.

REMEMBER Driving for someone's OB? The slip, the stamps and the client confirmation are one connected record — no more lost paper.

Hands-on: encode a paper pass slip

Do it now on the practice account — or on your own phone if you already have a login.

SCENARIO

You are handed yesterday's paper pass slip: employee J. Cruz, Santiago City Hall meeting, this Friday, official DICT vehicle, one companion.

15

MINUTES

solo or in pairs · one phone or laptop per pair

YOUR TASKS

- 1 Apply — Steps 1 & 2**
Encode purpose and Friday's date; pick Official DICT vehicle.
- 2 Apply — Steps 3 & 4**
Choose the supervisor, add the companion, check the print preview.
- 3 Trace the approvals**
Open an approved sample slip — find the guard DEPART stamp and the QR.

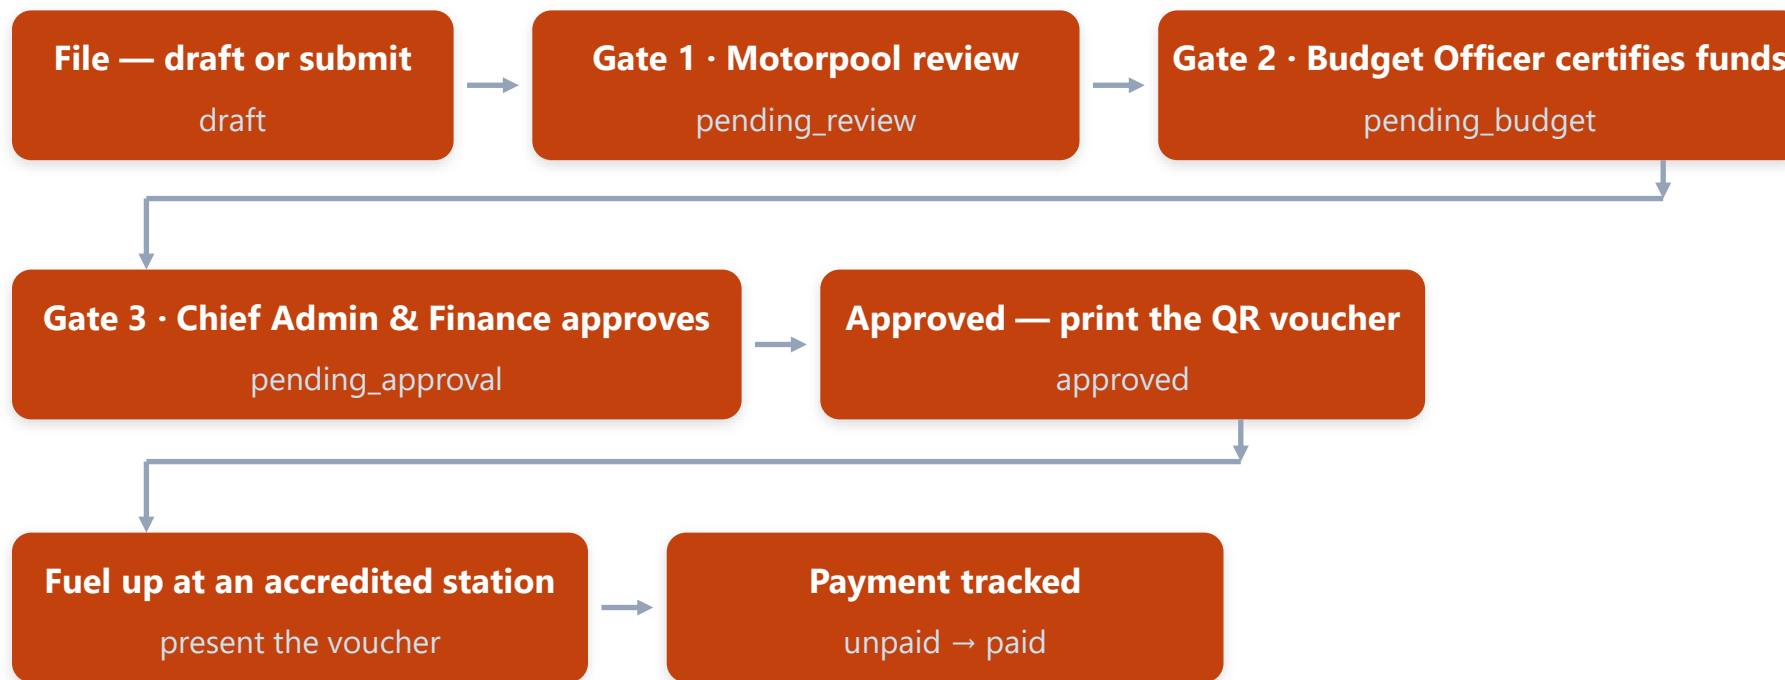

YOU'RE DONE WHEN

You can name the 4 sections and who approves: **official = supervisor + motorpool, private = supervisor only.**

STOP 3 · GAS VOUCHER

No fuel moves without three pairs of eyes

A numbered fuel authorization with three approval gates — and a QR code that proves it is real at the pump.

Any gate can reject

A rejection comes back with the reason — fix it and file again.

Only accredited stations

Pick from the official station list; the voucher states vehicle, fuel and liters.

Finance closes the loop

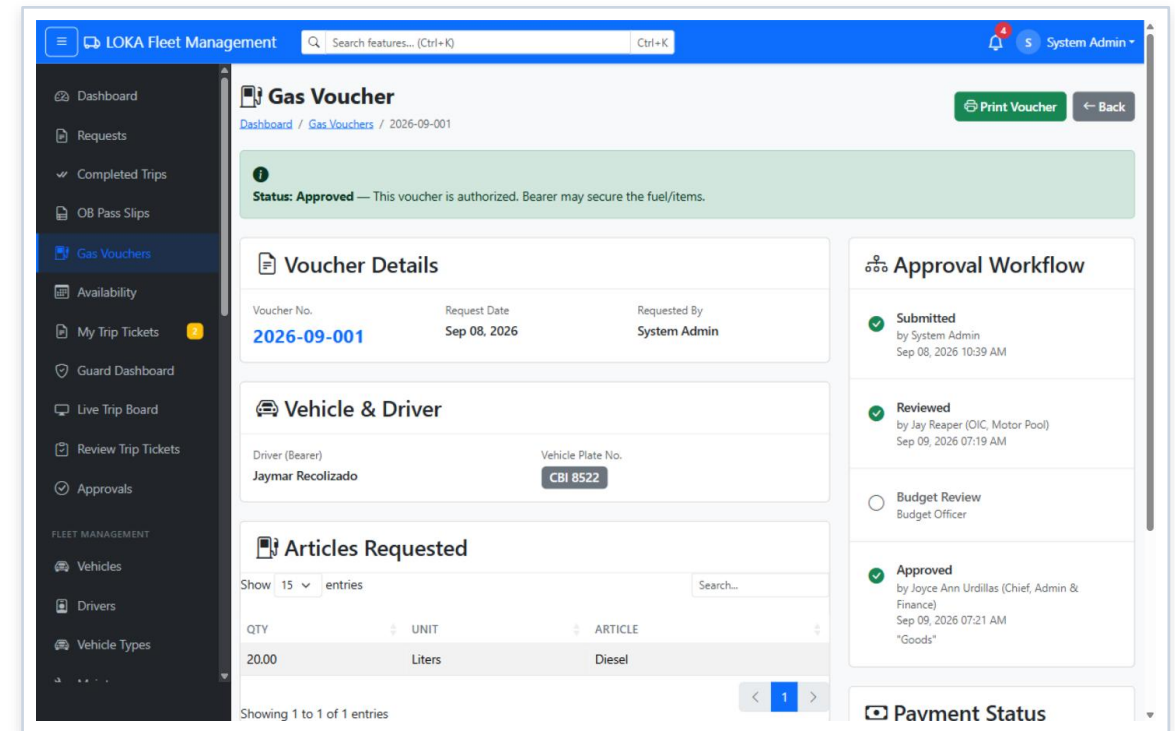

Payment status is tracked until the station is paid — no mystery balances.

STOP 3 · YOUR PART

Getting fuel the digital way

Five steps from request to a full tank.

- 1 File the voucher**
Vehicle, fuel type, liters, accredited station — draft or submit.
- 2 Track the 3 gates**
Motorpool review → Budget certification → final approval.
- 3 Print once approved**
The printable voucher carries a QR code.
- 4 Present at the pump**
Station staff scan the QR — a public page proves it is genuine.
- 5 Payment status**
Finance marks it paid — you see where the voucher stands.

An approved voucher — status banner, approval workflow and articles.

REMEMBER The QR code is the anti-fake check — station staff verify it on any phone, no login needed.

Hands-on: file it, then prove it

Do it now on the practice account — or on your own phone if you already have a login.

SCENARIO

The patrol vehicle needs 20 liters of diesel before a long trip. The station is on the accredited list.

15

MINUTES

solo or in pairs · one phone or laptop per pair

YOUR TASKS

1

File a voucher

Gas Vouchers → New. Vehicle, diesel, 20 liters, station → Save as draft.

2

Submit it

Open the draft → Submit. Watch the status become Pending Review.

3

Verify a real voucher

Open the approved sample on screen and scan its QR with your phone.

YOU'RE DONE WHEN

You can explain why a pending voucher cannot fuel a trip, and what the **QR proves at the pump**.

Your ticket, your numbers

Every completed trip becomes an official record — and every trip you drove is extractable on demand.

The trip ticket — one trip's official record

Show 15 entries

COMMENTS

Every assigned trip in a date range + your ratings — export CSV / PDF.

Pulling your own trip record

Sixty seconds, any date range, print-ready.

1 Open the report

Reports, then Driver Trip Extract — as a driver you automatically see only your own trips.

3 Read the summary

Trip count, evaluations received, and your fair rank score for the period.

5 Choose columns

Tick what you need — plate number, invite counts, comments — the screen is the export.

2 Set the range

Choose From / To dates. Filters for vehicle and control number are there too.

4 Scan the trips

One row per trip: date, control no., destination, overall rating and the 4 rating categories.

6 Export

Download as CSV (for encoding) or PDF (for printing and filing).

REMEMBER Raters stay anonymous — comments always print as “Anonymous passenger”. Trips with no ratings yet show a dash.

Hands-on: ticket it, then extract it

Do it now on the practice account — or on your own phone if you already have a login.

SCENARIO

You have just returned from a completed trip. The office needs the record for the file — today, while details are fresh.

15

MINUTES

solo or in pairs · one phone or laptop per pair

YOUR TASKS

1 Create the ticket

My Trips → a completed trip → Create Ticket. Check times and odometer.

2 Save and open it

Save, then view the ticket — control no., route, passengers all pre-filled.

3 Pull your extract

Reports → Driver Trip Extract → set this month → Export PDF.

YOU'RE DONE WHEN

You created a ticket and exported your own extract — **no logbook, no handwriting.**

Your alerts, in your pocket

LOKA Fleet can push the same alerts to the Telegram app on your phone — free, fast, and it works anywhere.

1 Never miss an assignment

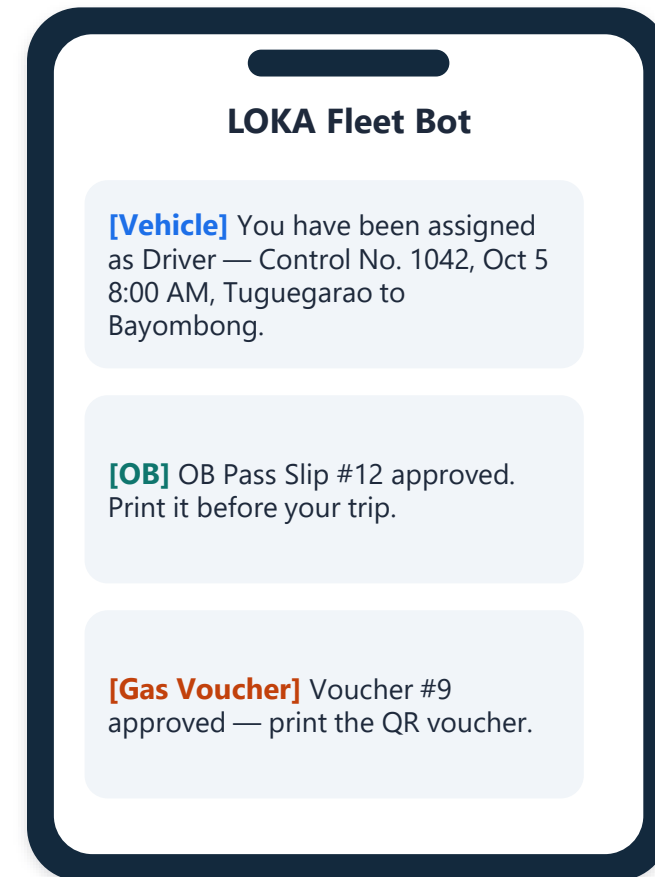

The driver-assignment ping reaches you even when you are away from the office desk.

2 Same events you already get

Every alert that hits your bell and inbox can also land in Telegram — tagged per process.

3 Private and opt-in

Only you can link your account. No link, no messages — nothing is broadcast.

The [tag] matches the email colors — you know the process at a glance.

STOP 5 · ONE-TIME SETUP

Connect Telegram in two minutes

Do this once today — every alert after that arrives on its own.

1 Install Telegram

Free app — register with your mobile number.

2 Open your profile

Log in, click your name, Profile, Messenger Alerts.

3 Click Connect

The system shows a one-time link and a short code.

4 Open the link

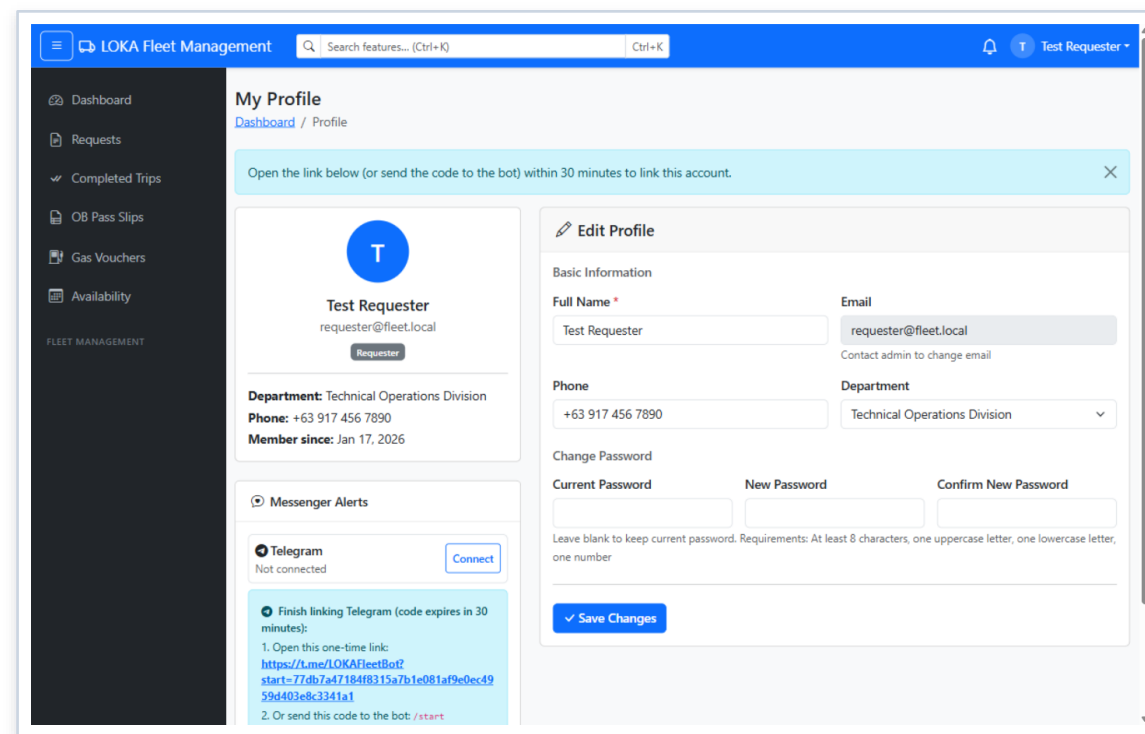

Telegram opens with the LOKA Fleet bot — press START.

5 See Connected

A green Connected badge appears. You are done.

6 Anytime: Disconnect

One click in the same card — or ask an admin.

Profile → Messenger Alerts — the one-time link and /start code.

REMEMBER The link is one-time and expires after 30 minutes — if it lapses, just click Connect again for a new one.

Hands-on: connect before you leave

Do it now on the practice account — or on your own phone if you already have a login.

SCENARIO

Your next assignment could come while you are on the road. Set up the alert channel on your own phone — now, not later.

15

MINUTES

solo or in pairs · one phone or laptop per pair

YOUR TASKS

1

Install Telegram

Play Store / App Store → register with your mobile number.

2

Connect in LOKA

Profile → Messenger Alerts → Connect → open the one-time link.

3

Press START

The LOKA Fleet bot replies — your profile shows Connected.

YOU'RE DONE WHEN

Your profile shows a green **Connected** badge — the next assignment will ring on your phone.

Fresh from the workshop: what's next

Four new tools are built and being tested. Each ships switched OFF until the region is ready — expect them soon.

● GPS Trip Tracking

for drivers

See the vehicle live during a trip — from the driver's phone. Starts at the guard's dispatch, stops at arrival.

● AI Assistant

for everyone

Ask in plain words — “What is the status of my trip?” It shows what it is checking, then answers with a link.

● Vehicle Repair History

for motorpool

Every repair with parts and cost, one record per plate — searchable and printable, imported from the old Excel workbooks.

● Deeper Rollback View

for admins

Admins can step a request back to any earlier approval stage — with the complete trail kept for audit.

Why “experimental”?

1 Off by default

Nothing changes until the region switches it on in System Control.

2 Tested first

Fully built and QA'd locally; staging next — production only after sign-off.

3 You will be told

Drivers get a heads-up (like this one) before GPS or the assistant go live.

Your phone becomes the trip tracker

While you drive a dispatched DICT vehicle, motorpool can see where you are — no extra device, no app store.

1 Starts and stops by itself

Guard DISPATCH starts sharing; ARRIVAL stops it. No buttons for you.

2 One-time consent

First trip: tick "I agree to share my location" — it is always your choice.

3 Keep the page open

Add it to your home screen. A locked phone pauses sharing — trail just stops.

4 Gentle on battery

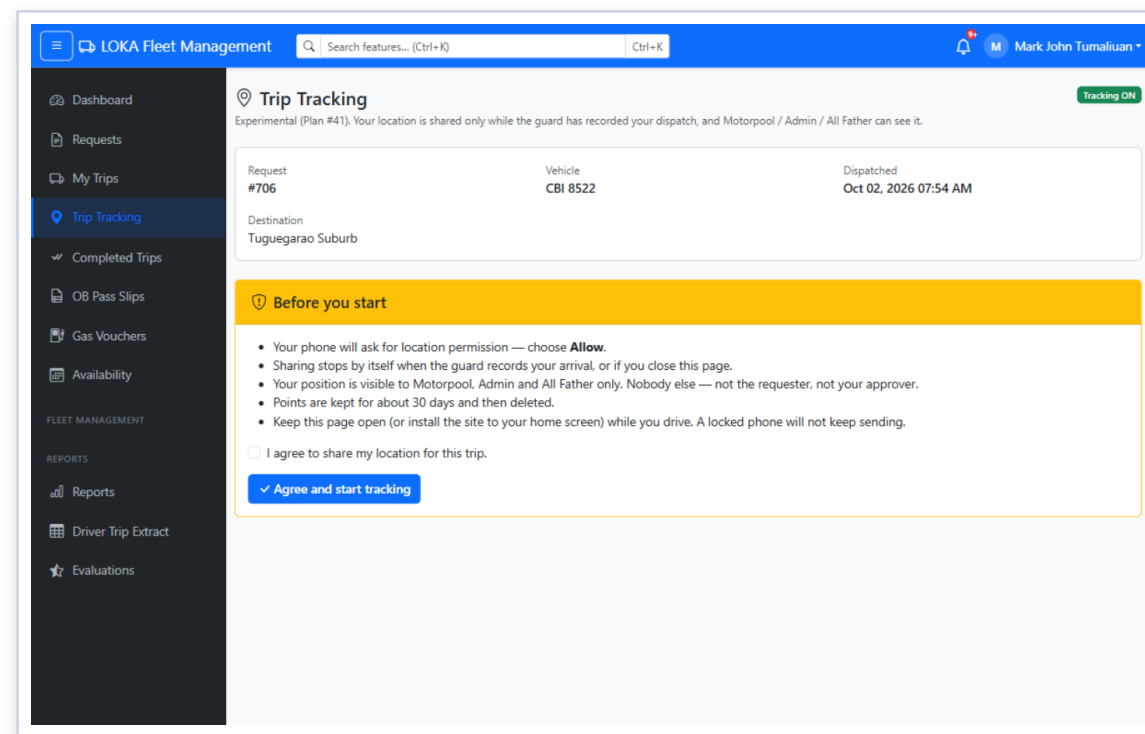

One location ping about every 45 seconds while you move; weak fixes are dropped.

5 Private by design

Only Motorpool, Admin and All Father ever see it — never the requester or approver.

6 Nothing kept forever

Points auto-delete after 30 days.

The driver's Trip Tracking page — trip, vehicle and the consent box.

REMEMBER Experimental and off right now — when the region switches it on, you will get the same walkthrough live.

Ask the fleet assistant in plain words

A chat bubble on every page — ask about your trips, pass slips, vouchers or approvals instead of digging through menus.

1 Just ask

“What is the status of my current trip?” — it understands and looks it up.

2 It shows its work

Every lookup appears as a trace line (“Searching your trip requests...”) before the answer.

3 Answer + deep link

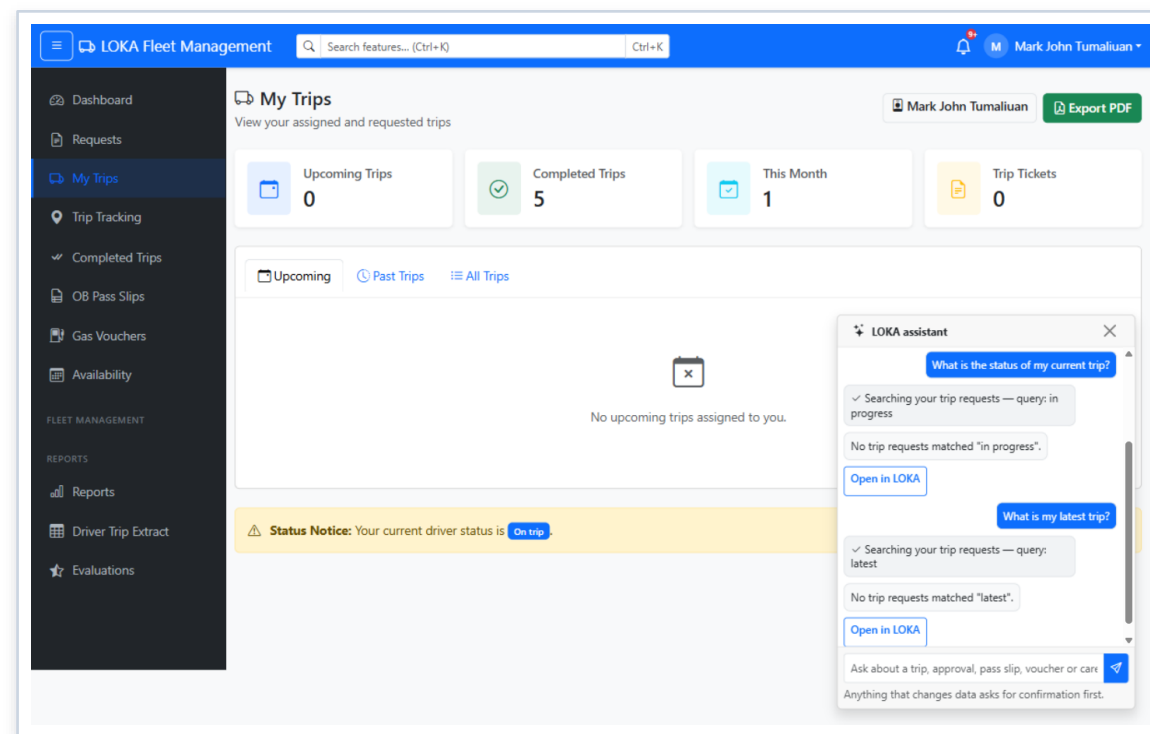

Results come with an “Open in LOKA” button straight to the record.

4 It cannot click buttons

Approvals stay human — the assistant at most opens the right screen for you.

5 Safe by default

Writes ask for Confirm first; rate-limited per user; fully logged in the audit trail.

Real session — the trace line shows the lookup, then “Open in LOKA”.

REMEMBER Experimental and off right now — switched on per region once the free AI model pool is proven reliable.

Six golden rules in LOKA Fleet

Small habits that keep your records clean and your trips smooth.

1 File early

Requests and pass slips need lead time — the booking window is enforced automatically.

3 Odometer honest

Readings are checked against vehicle history — log the real numbers.

5 Your login = your name

Every approval, stamp and ticket is logged under your account. Never share it.

2 Mind the gate

Departure and arrival stamps make the official record — no stamp, no completed trip.

4 Ticket right away

Create the trip ticket as soon as the trip is completed, while details are fresh.

6 Connect Telegram

One-time setup so the next assignment finds you on your phone, not on a bulletin board.

Thank you!

Questions? Anything unclear on any of the five stops — ask now, or find us at the motorpool office.
